

THE CHRONICLE

VOL. XIV. No. 20. CROSSFIELD, ALBERTA. THURSDAY, AUG. 18th, 1921. PRICE \$1.50 A YEAR.

WM. LAUT REPAIR TIME

Repairs for "Haying" and "Harvesting" Machinery should be looked after now.
Our stock is complete for both the International, and John Deere lines, and it will pay you to get your extras before some lines are depleted-
SECTIONS, GUARDS, LEDGER PLATES, must all be in good shape this year to cut the short grass -- you will waste time and horse flesh trying to use old ones.
Our stocks are larger, our service is better, our prices are a little lower and our
TERMS are CASH
on Repairs this year.

William Laut,
Groceries, Hardware, Implements, Harness.

J. A. VALIQUETTE,
BARRISTER AND SOLICITOR
Calgary Office: 810A First Street West.
Phone #1467.

At Hotel, Crossfield, Saturdays 10 a.m. to 1 p.m.

Importation of German Goods

The agitation of importers of German goods against the provision proposed in his budget speech by Sir Henry Drayton, Minister of Finance, that Canadian Customs shall disregard any depreciation in foreign currency greater than 50 per cent, was commented on in a recent interview with the Senior British Trade Commissioner, Capt. E. J. Edwards, of Montreal, with the remark that the prevention of imports of German goods at ruinous prices appeared to be just the aim in putting forward this provision. The German goods being brought in are, moreover, largely goods which are also manufactured in Canada, such as drygoods, coats, silks, etc., not to mention other things, such as cutlery, manufactured in the United Kingdom.

"In allied and neutral countries the belief is general that German banks and other financial interests are artificially depressing their rate of exchange," said Capt. Edwards, "with the object of preventing imports into their country, and assisting them to build up their export trade again at the expense of the allies."

"It is contended by these importers that prevention of German imports will increase the depreciation of the Canadian dollar, by forcing more purchases from the States. Fifteen months ago German imports only totalled \$2,502, but a year later, in February last, the figure jumped to \$322,757. For the 11 months ending February, 1920, German imports (from Canadian Government figures totalled \$29,648, but for the 11 months ending last February they had made another enormous jump, to \$1,395,380. Despite the jump, these figures are still insignificant against Canadian trade with the Mother Country, and the States, and I cannot see how Canadian currency will lose in value because German goods are prevented from being dumped at artificially low prices. Such goods as Canada must import can be obtained within the Empire to Canada's better financial advantage than from the States."

"It seems to me it is a question of the Canadian public supporting their own and British manufacturers against German ones," said Capt. Edwards, "and I have no doubt as to their preference. Sir Henry Drayton declared that to prevent financial ruin Canada must purchase more of her own and British manufactures, a statement I thoroughly endorse, and I am sure he did not think it any wiser to import German dumped goods than those of the United States. When Germany realizes the impossibility of exporting goods at sacrifice prices I believe she will quickly straighten out her financial methods, until her currency becomes normal and Canada, in common with other countries, can trade with her on a fair basis."

To Protect Livestock Trade

No Animal May Be Shipped out of Dominion Without a Certificate of Health.

The efforts of the Dominion Department of Agriculture to secure clean bill of health for Canadian livestock have been unusually successful, it is asserted by officials of the department. No animal, alive or dead, and no product made from the carcass of an animal, may be shipped out of the Dominion without a certificate of the Health of Animals Branch of the Department of Agriculture. These certificates have to be shown and verified both at points of departure and arrival.

Many Agricultural Publications. During 1920 the publication branch of the Department of Agriculture circulated 2,262,850 publications. This total was made up of 15,719 reports, 243,314 bulletins, 712,911 seasonal hints, 117,692 pamphlets, 168,155 circulars, 27,038 leaflets, 92,216 announcements and 64,745 agricultural gazettes, in addition to posters and mailing lists.

B.C. Lumber For Chili.

The first consignment of lumber to Chili for many years left Vancouver recently, being shipped by T. S. McCay, Harbor Commissioner for Vancouver.

Many Invalid Soldiers

Department of Soldiers' Civil Re-establishment Has 5,858 Hospital Cases Under Its Care.

The Department of Soldiers' Civil Re-establishment still has 5,858 undischarged hospital cases under its care, of which 5,324 are in Canada, 276 in the British Isles, and 253 in the United States. The department has on the strength 58 infirmaries, outside of insanity and tuberculosis cases. There are 500 psychopathic cases. Imperial soldiers on this continent are taken care of by the department as well as Canadians.

Photo Play at Lake of the Woods.

E. Hardcastle, of the Associated Producers, Limited, announces that the company has secured a studio site on an island in the Lake of the Woods district and will commence on the production of Canadian photoplays. It is suggested that this may become the permanent base for the productions of the company.

Vancouver's Population.

According to a directory census recently compiled the population of Greater Vancouver is estimated at 222,618, exclusive of Orientals who are said to number at least 15,000. The estimated increase during the year past is slightly over 20,000. This ranks the Pacific city as the fourth of the Dominion.

The Spirit of Adventure

Mysteries of the Unexplored Places Ever Beckon the Adventurers.

The bare catalogue of the hopes of the Shackleton expedition may well tempt high-spirited boys into running away to sea, and may turn old men into wishful youths. For what are scholarship examinations, or the counting-house, or even the comfortable armchair that they should not be as dust and ashes compared with the quest for petrified forests, lost islands and submerged continents? Are not whales and fur seals, unknown birds, the mystery of the Antarctic ice, and lone rocks to serve as wireless relays, better than the dull duties of home? But Sir Ernest has no vacancies; his old and tried companion have hurried to his call. There is nothing for us but to wish him good luck and to look forward to the joy of reading his stories.—London Times.

YOUNG LADIES, READ THIS

If you are bothered with pimples, rashes, and ugly blotches on your face, if your complexion is sallow, it's an evidence that you require Dr. Hamilton's Pills to tone up the blood. One of these splendid regulating pills makes a complexion like peach bloom—checks soon become rosy, eyes brighten, you again look the picture of health, and you feel better because you use Dr. Hamilton's Pills of Man-drake and Butternut, 25c at all dealers for The Catarthozone Co., Montreal.

War To End Officially

Setting of Date Will Mean Much to Business.

The date for the official termination of the war, except as regards Turkey, will be September 1.

Under the "termination of the present war act" the war could not be declared officially ended for Great Britain until all the peace treaties had been ratified, but it has been decided that the treaty with Turkey might be ignored. The last of the other treaties, that with Hungary, was ratified in Paris recently.

The setting of the date for the official end of the war will pave the way for the settlement of all financial transactions outstanding between the Bank of England and the stock exchange and will mean much to certain lines of business.

Hiccup Epidemic Prevalent

Don't get the habit of hiccup—stop the slightest attack at the beginning. Nothing brings such rapid relief as slowly sipping a few drops of Nervine in sweetened water. For stomach pains, bloating, cramps, diarrhea, nothing will prove more useful in every home than a 35 cent bottle of good old Nervine.

Science, say the medical scientists, may be caused by the habit of sitting perched on the edge of a chair.

Asthma's Victims Relieved. To overcome a severe case of asthma try Dr. J. D. Kellogg's Asthma Remedy. Its splendid record of its long recommendation. By relieving the air passages and restoring natural breathing it effectively aids Nature in combating this distressing and dangerous ailment. To many thousands of Asthma's apparent and confirmed victims, the healing fumes of Dr. Kellogg's Asthma Remedy have brought relief.

Because a girl refuses a young man you needn't suppose it's a sign that she isn't going to marry him.

Minard's Liniment Relieves Neuralgia

Farthest North Police Post

R.C.M.P. Post Is Now Established In Extreme North of Baffin's Land.

A new farthest north R.C.M.P. post has been established at Pond's Inlet in the extreme north of Baffin's Land. This is now the most northerly post held by the force of coast riders, the nearest to it being those at Chesterfield Inlet and Cape Burwell at the entrance of Hudson's Straits. A sole staff sergeant will be full police authority at Pond's Inlet and will have full charge of customs and judicial control of Baffin's Land and the territory about it. Only a few Eskimos are to be found there and it is the occasional port of call for traders.

Minard's Liniment For Burns, etc.

Tanlac Does Just What People Say It Will Do, Declares Calgary Man

"I will never miss a chance to say a good word for Tanlac, especially to my own comrades, many of whom I know are in the same condition I was in after I came out of the trenches," said A. Reff, 1507 Eleventh Street, West, Calgary, Alberta; agent for the Prudential Life Insurance Co., who served in France with the Twenty-Eighth Battalion of Regina.

"I came home from France suffering from stomach trouble, shattered nerves and with my blood in such bad shape my face was covered with pimples. I didn't have any appetite to speak of and I lost weight until I was almost as thin as a rail. What

little I did eat would form gas that bloated me up till I suffered hours of misery.

"I was under treatment and constantly took medicine, but nothing reached my case except Tanlac. I am in tip-top condition to-day, with a big appetite, perfect digestion and nerves that are steady as steel. My blood has cleared up, too, and I am just brimful of life and energy. I feel fine. I am not surprised that people talk about Tanlac so much, for it does just what they say it will do."

Tanlac is sold by leading druggists everywhere.

French-Canadian Settlers

French Farmers From New England States to Farm in the West.

Forty French-Canadian settlers, with their families, arrived in Winnipeg recently en route to farms in the Saskatchewan and Edmonton districts. They came from the industrial centres of New England States, to which they had migrated from Eastern Canada before the war. Most of them were farmers at one time, and they are repatriating to resume their former occupations.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours they may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child and will promptly relieve these troubles if they come on suddenly.

Baby's Own Tablets should always be kept in every home where there are growing children. There is no other medicine so good and the mother has the guarantee of a government analyst that they are absolutely safe. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Manitoba Beekeepers Are Prosperous

Return of \$1,500 In One Season From Thirty-three Hives.

The beekeeping industry is making rapid headway in Manitoba and the outlook for a large honey crop for this year is very bright. Beekeeping demonstrations are being held at different places in the province. In the Swan River Valley in Northern Manitoba, J. C. Dodge reports a return of \$1,500 in honey in one season from thirty-three hives. A settler at Dominion City reports that from a swarm taken that came to his farm six years ago he now has seventy-two colonies and last year sold over two tons of honey at 35 cents a pound.

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectively that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

Western Wool Grads Well. Alberta range wools are grading out with exceptionally good handling and spinning qualities and are attracting favorable attention by many Canadian mills. Sheep shearing in Southern Alberta is completed.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

The Germans prepare an excellent substitute for tea from the common strawberry plant.

LOCAL AND GENERAL

We understand that Mr. Frank Moscop has purchased the Ross Peacock farm and intends taking up residence on the place in the near future.

Miss E. M. Smart and Miss E. Grange visited Miss Smart's sister at Woolford, Sask., for a few days during the past week.

Mrs. E. E. Young, of Calgary, and Mrs. W. L. Cain, of Chicago, spent a few days at the home of Mr. and Mrs. H. L. Montgomery during the past week.

Benefit of Tree Plantations on Prairie Farms

There are several ways in which plantations of trees benefit the prairie settler, the most important of which are the following:—

1 They afford shelter from the wind to crops, buildings and stock.

2 They collect and hold the snow during the winter, preventing it from banking up around buildings.

3 They preserve and retain the moisture in the soil by breaking the force of the hot winds in summer thus retarding evaporation. The snow also held by them in the winter, melting in the spring, furnishes a great deal of moisture to the land in the immediate vicinity which otherwise it would not retain.

4 Plantations will supply fuel, fencing material, and wood for repairs. If settlers would only realize that they can grow their own fuel and fencing material, as they undoubtedly can, many more plantations would be set out, as this would mean to them a great saving in time and labour.

5 They are of aesthetic value, beautifying the landscape and making life on the prairie much more pleasant and less monotonous.

6 They greatly add to the money value of the farm. There is not the slightest doubt that a farm which had on it a well managed and productive woodlot of a few acres would, other conditions considered equal, sell for far more than one without trees.—Norman M. Ross, Dominion Forest Nursery Station, Indian Head, Sask.

Will Replace Obsolete Vessels With Battle Cruisers of Hood Type

Announcement Made That Policy Cannot Be Construed As A Challenge to Other Nations.

London.—Discussing the naval estimates in the House of Commons Lieutenant-Colonel L. S. Amery, parliamentary secretary of the admiralty, announced that the four replacement ships the government proposed to build would be battle cruisers of the Hood type armed with 16-inch guns and designed to obviate the need of larger dockyards than at present exist. He declined to say how many guns they would carry on the ground that it was not customary to give such information in advance.

Contending that there was no element of challenge or provocation in this policy of replacing obsolete ships, Colonel Amery said it was simply a policy circumscribed within the narrow limits and postponed to the very last date consistent with the empire's safety.

Alluding to the building programmes of the United States and Japan, Colonel Amery argued that the

admiralty, by proposing the completion of only these four ships by 1926, was laying itself open to the charge of accepting the risk that the British navy would temporarily be inferior in strength to the navies of other powers, but the government was facing this risk in order to avoid any step tending to invite fierce competition on the eve of a conference for disarmament.

The object of the disarmament conference, Col. Amery said, was to endeavor to secure by agreement no further expansion of the navies of the three greatest naval powers, but as it was quite unlikely that the other powers participating in the conference would offer to scrap the ships already built or under construction, it was obvious that the building of these four ships, or even twice their number, could not in any way affect the problem before the conference.

Railway Wage Question

President Hanna Opposed to Submitting Matter To Conciliation Board at Present.

Ottawa.—Claiming that the time is not opportune for the submission of the question of wage reductions, affecting the employees of Canadian railways, to a board of conciliation, President D. B. Hanna, of the Canadian National Railways, has notified the Minister of Labor that he management of the National lines cannot agree to invoking the Industrial Disputes Act for that purpose. Mr. Hanna has pointed out that the agreement which the men have been asked to concur in is only tentative and is subject to revision. He suggests that if the usual meetings and conferences consequent upon permanent schedule adjustment, fail to bring an agreement on the question, it might then be necessary to resort to some form of arbitration.

Bush Fires Clear Settler's Land

Made Work of Removing Brush Moderately Easy.

Cobalt, Ont.—According to a settler along the main line of the Canadian National a few miles west of Cobalt, the recent bush fires there were not altogether an evil. The conflagration, while destroying his buildings and hay crop, made the work of clearing an easy proposition. "At present prices the cost of clearing one acre of green brush runs close to \$200, but after the fire, when the trees had been felled and milled, I cleaned up two and a half acres for \$30. Generally speaking, a good burn allows the settler in moderate circumstances to go ahead and remove the bush, whereas it would be impossible to do so without a fire," the settler said.

Sweden Wants Canadian Wheat.

Vancouver.—That Sweden is beginning to take an interest in Canadian wheat exports was evidenced in a letter enquiring into the possibilities of Sweden importing wheat from Canada, from Emanuel Cohen, broker, of Stockholm, received by the Vancouver Board of Trade.

Spend your money at home, thereby helping your own town and local merchants.

May Reduce Freight Rates

Montreal.—That the Board of Railway Commissioners of Canada will in the near future take steps to reduce the freight rates on Canadian railways, was the announcement contained in a letter received by the local board of trade from Hon. F. B. Carvell, the chief commissioner.

The Montreal Board of Trade recently addressed a resolution to the railway commission asking a reduction on railway freight rates commensurate with the 12 per cent cut in wages now in effect.

WESTERN EDITORS

A. Drew, Publisher of The Echo, Dominion City, Man.

Stockmen Want Assistance

Free Entry of Stock to United States Is Urged.

Calgary.—The present conditions of the livestock industry in Western Canada was the subject of an address by C. W. Peterson, president of the Farmers' Ranch Review, at an emergency meeting of the Calgary Board of Trade. The speaker pointed out that every person in Canada had a vital interest in the development of a successful livestock industry; it was the basis and foundation of the entire agricultural structure, he declared.

Mr. Peterson urged that immediate diplomatic discussions should be opened with the United States in order to procure for Canada free entry for animals and animal products. Even an unlimited overseas market, he said, could not for a moment be compared with free access to the Chicago market, which could completely absorb all classes of livestock.

"We are facing an acute situation almost amounting to a panic," he said, "and immediate action is necessary to cope with it."

Rust and Saw Fly Harm Crops

Considerable Damage Has Been Done In Some Sections.

Ottawa, Ont.—Rust and the wheat stem saw fly have caused considerable damage in some sections of the western wheat fields, according to reports on crop conditions at the end of July. In some sections the anticipated yield has shrunk considerably owing to the hot dry weather, but at other points late rains have ensured a heavy yield. Crops will not be uniform, some sections having a bumper yield and others a disappointing one. Harvest is unprecedentedly early owing to the warm and, in some places, very dry weather during July.

Serious Fires in New Brunswick

Over One Hundred People Are Rendered Homeless by Conflagration.

St. John, N.B.—Over one hundred people have lost their homes and general property damage estimated to be over \$3,000,000 has been caused by a series of big fires in various parts of New Brunswick during the past week. The fires nearly always burned themselves out because of the dryness of the buildings and the water shortage owing to the prolonged absence of rain.

Famine Condition in Russia

New York.—Russian horses, which numbered thirty-six million before the war, have practically disappeared, having been eaten by the famished population, it was revealed in Russian newspapers published in Moscow and received here by the American relief administration.

Meat had grown so scarce, more than a month ago, that it was resorted to by hospital patients. Classes in Moscow University were dismissed because they were too weak from hunger to continue their work, the papers said.

The Life of Ne-Gua-nan-I-sew

By O-GE-MAS-ES (Little Clerk).

(Copyright)

Such a handsome, good natured, bright young Cree Indian when he first traded with me in 1884 and we soon became fast friends and called one another Neshtow, meaning brother-in-law, an Indian term of endearment. He camped at my house a number of times and was the delight of my young children; in fact he always had an interested audience of old and young when telling Indian fables of the beginning of things, most of which I regret to say I have forgotten. How the loon received its handsome coat and power of diving, and the beaver was granted almost human powers of intelligence. In regard to the beaver it was a tradition amongst the Crees that at one time they were human beings but having offended the Great Spirit, loss of speech and the human form was taken away from them. Then there was a history for the bear, wolf and worst of all criminals amongst animals the dreaded wolverine who was said to have killed the white man and the Indian trapper.

Neshtow at this time, so he gradually informed me, was very much in love with a pretty Indian maiden called Tannis, a daughter of the South Wind, and on his visits to my trading store I could tell at once if the course of true love had been running smoothly or not, by his good spirits or the reverse.

It appeared there was a rival named Ake-apenas who, though a good deal older, was much better off in this world's goods, and consequently appealed more to the young girl's mother. His appearance, however, did not appeal to Miss Tannis at all, as owing to the bursting of a gun his cheek bone had been broken which gave him a sinister expression, and further he was a dour natured Indian at the best of times, in fact a complete contrast to sunny tempered Neshtow.

Mrs. South-Wind, however, like many mothers, was anxious to see her pretty daughter make a good match so there was the opposition of the parents to contend with. Tannis, however, finally brought matters to a show-down by telling Neshtow if he was a man at all they must elope as she positively refused to consider marrying Broken Face, as the rival was commonly called. He came in and told me the whole story and asked what I would do under the same circumstances. Why, take the girl of course, was my reply.

It was the height of the berry season and all the Indian women were busy engaged picking and drying Saskatoon berries for winter use. The plan was arranged that Tannis was to steal away from her comrades and meet her sweetheart at a place selected, he to have two ponies there. Every day went off smoothly and some days afterwards the newly married couple paid me a visit. There was no wedding ceremony, my dear reader, as these were both Pagan Indians; simply living together made the

bond quite as secure; in fact, very much more secure than many white weddings. Tannis made a very pretty bride and, in fact, they were a handsome couple, but as yet they had not even a home in the shape of a tepee, so they had simply spent their honeymoon like our first parents' in the open air of heaven. Neshtow finally appealed to me for some advances, notably sufficient duck to make a tepee, and then various other necessities. Thought my stock of trading supplies was very low at the time I could not refuse, and advanced them debt to a moderate extent, all of which eventually was repaid.

Time went on and in due course a baby arrived and this proved the means of reconciliation with the old folks who had missed their daughter extremely and could not help liking her husband (as everyone did) for his sunny bright ways. He was not a star hunter by any means but a most cheerful worker, and his little mate being very tidy it was a pleasure to visit such a well-kept tepee. The little grandchild lived and thrived for a year or so and then died, much to the grief of all the relatives. The medicine man had used all his remedies for months without effect, and they finally brought the child to me, but my medical skill was not sufficient to diagnose the disease. No less than three children were born to this fine young couple in the next four or five years, all of whom lived and thrived for a few months or so, then faded and died. In vain were Pagan rattles and offerings to appease the Mutchi-Manitou (Evil Spirit) and the young parents became very sad and despondent, thinking they were under an evil spell.

With the last baby they lost I had them camp close to my house when the child was about six months old, and after much persuasion made the mother wean the babe and bring it up on cow's milk diluted and some other infants food which my wife had procured. Alas, it all led to the same result, and when they both came into me with their hair dishevelled, their faces blackened, and literally in sackcloth and ashes, my heart went out to them in great sympathy and we wept together.

It is one of the saddest things to live alone in the wilderness and to be unable to help in times of severe illness, when one realizes with the resources of civilization precious lives might be often saved. Not only when sympathizing with poor Neshtow, but with my own family needed better medical skill than I could give them. I took a vow and it was this: That if ever a town grew up in the vicinity of my land there were two things I would try and accomplish as soon as possible. First, a church for the worship of the only true God, and then a hospital. I am thankful to say I have lived to see them both established.

(To be continued)

Germans Will Help

Ready to Assist Transport of Allied Forces to Upper Silesia.

Berlin.—The French and British ambassadors and the Italian chargé d'affaires delivered to Foreign Minister Rosen, on behalf of their respective governments, the note asking the German Government to take requisite steps to facilitate the transport of Allied troops across Germany. The note declares that the situation in Upper Silesia might at any moment render the sending of troops necessary. It was learned later, on good authority, that the Foreign Minister informed the Allied representatives that the German Government stood ready to accede to the demand and would confer with the Minister of Communication regarding the transportation of the troops.

Lays Eggs In Air

London.—Two states of valuable chickens which left Orpington, Kent recently at 9 a.m. were rushed to the air station at Croydon to catch the 10 a.m. air express to Amsterdam. At Amsterdam it was found that two eggs had been laid during the journey—the first case on record, it is claimed, of eggs having been laid in the air.

Want Ulster in Peace Plan

Causing Delay in Reply of Sinn Féin to the British Government.

London.—A dispatch from Dublin to the Press Association confirms the statement made in Dublin that the delay in the Sinn Féin reply to the British Government on the Irish peace plan is due to the fact that an attempt is being made to secure the adhesion of Ulster to the peace plan. The dispatch expresses the belief that, provided Ulster was disposed to adopt the attitude of give and take, the Sinn Féin would be willing to accept the government's proposals.

The attitude of Sir James Craig the Ulster premier, says the Press Association, appears to be that he is prepared to enter the conference in London but that until such a conference is arranged, he is not called upon to participate in the present deliberations.

Three Men Killed.

Patterson, N.J.—Three men were killed and three seriously injured in the Standard Silk Dyeing Company's plant, when an extractor on a "whirl" has been used in drying silk, flew to pieces. The whirling apparatus sprayed the nearby workmen with hundreds of scraps of bronze and iron.

High Average Production Shown By Farm Lands Throughout The Dominion

Whilst Canada comes into open competition with the world in the quality of her agricultural produce of all kinds and can grow on her fertile farms crops of the highest grade, she is unable as yet to enter into comparison in the matter of total production. A vast portion of her rich agricultural lands, amounting to many millions of acres, and forming potentially one of the world's great farming areas, is undeveloped and awaits settlement and the plough before producing to capacity in the manner that has made the quality of Dominion crops famous.

Canada can, however, come into active competition with other countries largely agricultural, the United States, for example, with respect to the fertility of her land, its growing qualities and those of the Canadian climate and farming region. Compared as to average production, she makes a very fine showing. A comparison between Canadian and United States production for the past three years shows that Canada has maintained a high standard in all the crops she cultivates, and has in the majority of cases exceeded the average achieved by the older producing country.

It is not so long ago since doubt was expressed that it would be possible to grow wheat profitably in Canada. Canadian farmers answered this by taking most of the premier honors for this crop at international exhibitions. Not only that, but it is apparent that the Dominion preserves a higher average production throughout the country in both spring and winter varieties than the United States, taken as a whole. In the year 1920, when the production of spring and winter wheat in the United States was 10.8 and 15.3 bushels per acre respectively, Canada secured an average of 14 and 24 bushels. In the previous year, 1919, with a United States production of 8.8 and 14.9 bushels, Canada's average yields per acre were 9.39 and 23.75. To go back another year, they compared 16.2 and 15.2 as against 10.75 and 19.00, the United States obtaining a greater average of spring wheat in that season.

A comparison of the respective yields of the past three years in oats indicates that Canada, although she secured most of the international honors for the quality of her product, has fallen slightly behind the United States in average production per acre. Whereas in 1920 her average production was 33.50 bushels per acre, that of the United States was 35 bushels. In the previous year, when she produced 26.25 bushels, farmers, across the line managed to achieve 29.4 bushels. In the year 1918 the yield stood at 34.7 and 28.74 with the United States in the ascendancy. The same slight difference is recorded in barley, the average yields being 25.6 and 24.75; 22.4 and 21.75; 26.3 and 24.50.

There would appear to be no doubt left as to the greater suitability of Canadian land to potato production after a survey of the comparative figures of production. Against the United States average of 109.6 bushels to the acre last year, Canada produced 170.50. Her yield in 1919 was 153.50 against the 90 bushels reached across the line. When the United States produced 95.9 bushels in 1918, Canada achieved 142 bushels.

Slight divergencies only are observed in the hay yield of the two countries, both in the tame and wild varieties. Taking the average of all the hay produced, the United States secured a slightly higher production in 1920 when the yield per acre was 1.34 ton against Canada's 1.30 ton. The advantage is substantially Canada's in the two previous years, however, with averages of 1.55 and 1.40 against 1.30 and 1.15.

A Mediterranean Cruise.

The Canadian Pacific Railway steamer "Empress of Scotland," which was to have been bound for Montreal-Liverpool run, has been chartered to F. C. Clark for his seventeenth cruise of the Mediterranean Sea. The vessel will leave New York, visit the leading Mediterranean ports, stopping fifteen days in Egypt, and return via Liverpool. She is now being refitted in England.

W. N. U. 1380

Fortitude Not Always Heroic

Low Organization Sometimes Accounts for Resignation to Suffering.

In reptiles and certain animals the brain is small, a peculiarity which explains their slight intelligence and the almost entire impossibility of teaching them anything. They can, it is true, be tamed; but although they seem to know individuals, they do not seem to be susceptible of affection; the slight compass of their brain renders them very insensible. This insensibility to pain enables them to support mutilations which would prove immediately fatal to most other animals.

A tortoise will continue to live and walk for six months after it is deprived of its brain. It is obvious, therefore, that these kinds of creatures can endure very splendidly that which, in the ordinary way, would be called pain, not because they have fortitude, but because they have insensibility. They remind us in this of many men and women who get great credit for the manner in which they endure the ills of life. Some are praised for their religion, others for their philosophy, others for their magnanimity when investigation will often reveal the fact that the real reason of their composure is to be found in their low organization.

When a moral hero bears pain with bravery he does so at an immense effort, because, since he has capacity for vast feeling, so also has he capacity for vast suffering. When a dull and stupid man endures suffering with resignation it is usually because his nature is not endowed with high sensibility. Extremes meet, and he often takes his stand by the hero and is applauded for virtues which he does not possess.

Seven million coins are turned out every week by the British mint. One week's output of coins would, if laid out in a single layer, make a gold, silver and copper carpet ten yards wide and more than a quarter of a mile long.

To Make A Survey Of The Dry Areas In Two Western Provinces

Produce Trade of B. C.

Chinese and Japanese Getting a Strong Grip on the Trade of the Province.

That Orientals are getting an increasingly firm grip on British Columbia's produce trade is indicated by figures compiled by the Provincial Department of Agriculture. More than 55 per cent. of the potatoes produced in the province are now grown by Chinese.

Most greenhouses around Victoria district are now controlled by Chinese, according to the report. In the Victoria district, Chinese have 193,570 square feet under glass and produce large quantities of early tomatoes, lettuce, other produce and flowers. In Vancouver 90 per cent. of the produce supplied to the markets is produced by Chinese.

In the famous Ashcroft and Lillooet districts, Chinese now own 2,500 acres and lease 1,905 acres more, the report shows. Their holdings in these districts are in blocks, running as high as 640 acres. Recently more sales of land have been made direct from the white farmer, who finds he cannot make production pay, so the Oriental.

Officials of the Department of Agriculture are now investigating records to find out just how land is acquired by the Japanese. Two Japanese in one district were interrogated, says the report, and explained that in acquiring land the system was for the Japanese purchaser to make a selection, and when the purchase was approved by the Japanese Consul the price was paid by that official. Of the 4,500 acres of small fruit in British Columbia, 2,341 acres are controlled by Japanese.

Farming conditions in Western Saskatchewan and Southern Alberta are to be subjected to an investigation which is expected to have far-reaching and happy results. The first steps looking to this inquiry were taken a few days ago by Vice-President M. A. Brown, of the Western Canada Colonization Association, after consultation with the Saskatchewan board of directors and available members of the Alberta board, Lieutenant Governor Brett, James Ramsey of Edmonton, Pat Burns and General H. S. MacDonald of Calgary, and C. S. Noble of Nisibetford, Alta.

The inauguration of this survey is in keeping with one of the primary objects of the association which is to improve the lot of farmers already on the land and to retain existing settlers in the country. It is a work which can be carried on while the actual business of colonization is temporarily suspended pending the conference of Provincial Premiers on land lating legislation which is to be called by Hon. T. C. Norris once the new Alberta Government is actually seated in office.

Its promoters believe that the decision to look into prevailing conditions in the south country will undoubtedly have the enthusiastic and unanimous backing of all the governments, legislators and other public men, as of the bankers, the mortgage and loan companies, the implement dealers and other business men. The Premier of Saskatchewan, the outgoing and incoming premiers of Alberta and other cabinet ministers in both provinces are heartily lending their aid.

Oil Wealth of Northland

Oil, Gas and Coal Is Found To Exist Over Wide Area.

The whole of the Canadian north from Fort Norman into the Arctic and the Mackenzie basin seems to be underlaid with oil natural gas and coal, declares Howard Colley, who returned from that district recently, after staking claims. In many places the oil is boiling up out of the ground in natural wells, he said. There are coal seams projecting almost everywhere and in some places whole cliffs are exposed. Mr. Colley said the coal is not a hard variety, but seems to be good bituminous coal. Natural gas is almost as common.

In the northern part of the district the Eskimos are using the natural gas. There are soft earth formations into which they poke long sticks which they turn around. Gas comes out of the hole thus formed. They light it and have a flame for cooking.

"But no one thinks of gas or coal up there," Mr. Colley went on. "It is only the oil they are after. They do not seem to be interested about going out and breaking off pieces of coal for fuel in their stoves. All cooking and heating is done by oil piped from the wells. As it comes from the well at Fort Norman the oil is like kerosene. After it was strained through a moose hide it ran a gasoline engine.

Utilize Arctic Wastes

American Comment on the Reindeer Project in the North.

The Canadian are a thrifty people, says the Cleveland Plaindealer, but they have not, until recently, suggested a practical way to get any return from their tremendous possessions. Now one suggestion of peculiar merit has been made, and is to be acted on. Reindeer are to be introduced in several localities where there is a good chance of their becoming naturalized. The Alaska reindeer experiment has proved so great a success that the Canadians are determined to repeat it on a much larger scale. With reindeer well established, Canada will have a new and important source of meat supply. This, probably, is the chief consideration. But of scarcely less importance will be the service of the reindeer as a means of opening up new regions. Winter or summer the animals may be used in harness.

Patrons of local merchant and thereby help to build up your home town and community.

DISTRIBUTING IMMIGRANTS

A family group of settlers in Canada.

Two thousand immigrants have arrived in a single day at the port of Quebec. They have landed from three Canadian Pacific Ocean Liners; they have been inspected, examined and docketed by officials and inspectors—governmental and railway; their foreign money has been exchanged for Canadian currency, what remains is the process of distribution and assimilation.

Two thousand crowd the Government Immigration Hall, waiting to make another leg of their long journey. They have come from everywhere and are going to everywhere. The map of Europe and of the British Isles are represented in this mass of humanity—sturdy Scandinavians from Northern Europe, dairy workers from Denmark, Poles by the group and family, fleeing from their war-torn country; all the new Little Lands created by the League of Nations have contributed of their sons, as all the Central European countries in Ukraine, Rumanian, Czech-Slovak and Russian, Sektinland and Italy are also represented in the composite crowd, all making a hu-

man inflow of a day that illustrates the mixture of races in this land of promise.

Another shipload follows those of the Corsican and Tunisian. The Melita brings an exclusively British army of immigrants, the latter covering the British Isles as the foreigners do Europe, while all the way from John O'Groats to the Land's End is heard from.

The government is through with them and the Canadian Pacific Railway practically takes charge. Both unite in directing the big crowds to their respective trains. "Long lines of cars—tourist, colonist and teacher—parallel the hall, each clean and well-lit for their occupation. Big paning locomotives are ready for their task. A large staff of officials and trainmen are on their job, keeping their heads as well as their tempers under strong temptation to lose both. Some of the newcomers are nervous and frightened, some are excited and fussy, and some are 'fickleless' in the word of a Scotch observer. Perhaps we would be, too, if we were in their place, a long way from home and not quite sure of tomorrow.

Carefully and cleverly the passengers are stowed away—the westward-bound in trains that will head direct for Winnipeg and all beyond to the going down of the sun; the Ontario ones are in trains billed to Toronto, for redistribution from that centre. Families are given cars to themselves, women folks are treated the same, and the single men have other cars to themselves, rocking together like birds of a feather. Many groups formed during the voyage and that have the same destination, are also permitted to keep trains.

The women-filled cars are in charge of trained government "conductresses" who render a sympathetic service in a hundred ways that only travelling women and girls can appreciate, especially where babies are present, as they are most common. Thus train after train is filled, but not more than to capacity, and started—a new experience in a new land for a majority of them, and as Quebec city is circled, and the old province is entered, the largest in all Canada, passing the quaint farmsteads of the habitants, all eyes are centred on the landscape and the New World—F. Y.

Settlers in Canada

An Artist's Luck

Won Valuable Prize When Ill and Without Funds.

Frank Schwartz, twenty years old, trying to make his living as an artist was notified by his landlord that he must leave his stuffy room in a tenement over a saloon in the East Side, New York, unless he paid him rent, \$10 a month. On his way out he met the postman with a letter informing him that he had won the Prix de Rome, offered by the American Academy in the Eternal City. The prize gives him free transportation to Rome, free tuition in art, and an allowance of \$1,000 a year for three years.

The vicissitudes of an artist's life could scarcely be better illustrated. His mother died in Chicago when he was twelve years old, and his father, who was a hotel waiter in that city, left the boy to shift for himself because he insisted upon studying at the Chicago Art Institute. Instead of going into business where he could make money, it is not known how he managed to struggle along in the interval, but letters found in the boy's apartment showed he was desperate for lack of money. After leaving the army, with which he served in France as a member of the Camouflage Section, he was stricken with pneumonia. He was unable to work. Doctors advised him to leave the city. He could not do so; he had no funds. Then came the notice, sent by the agent for the tenements. And then the prize—Toronto Globe.

For Catarrh—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

To Slaughter Buffalo

Said That One Thousand Animals at Wainwright Will Be Disposed of by Government.

Owing to the increase in the buffalo herd at Wainwright, one thousand of these animals are to be slaughtered. A special building is being erected for the purpose. The buffalo meat will be sent to all points over the country for sale. A strict account is being kept of all heads and skins, which will probably be disposed of by the Dominion Government. The Wainwright reservation contains the largest herd of buffalo in the world, with about 3,000 animals.

Thinks Swearing All Right

Yes, providing the provocation equals the offence of Jones stepping on Smith's toe corn. Far better to use "Putnam's" Painless Corn Extractor, it does lift out corns in a hurry. No corn can last if "Putnam's" is applied. Refuse a substitute, 25c every where.

Advantages of Irrigation

Taber System Will Be Paid For In One Year By Increased Production.

Paying for an irrigation system in one year is the unique experience of the Taber project comprising 17,000 acres, just east of the irrigated area operated by the Canadian Pacific Railway. It cost sixteen dollars an acre to build the ditch and laterals and conservative estimates of the average yield on the 13,000 acres under crop are twenty bushels to the acre as against eight bushels on the dry land adjoining.

This is the first year that the Taber project has been in operation and farmers are naturally enthusiastic over its success. The many fields with thirty-five and forty bushel crops are, however, the most satisfactory evidence.

Patronizing Local Industry.

A profitable market for the product of sodium chloride is being developed by the Senlac Salt Company, which is engaged in developing the salt deposits at Senlac, Saskatchewan. A Calgary soap factory is utilizing the product extensively in its manufacture, instead of importing from Wisconsin as previously, and it is probable the wants of their Winnipeg branch will be supplied from the same source.

Minard's Liniment for Dandruff

PIMPLES ITCHED AND BURNED

Face Was Badly Disfigured. Cuticura Soap and Ointment Healed.

"Small red pimples and blackheads began on my face and my face was badly disfigured. Some of the pimples festered while others scaled over and there were places where the pimples were in blotches. They used to itch and burn terribly. I saw an advertisement for Cuticura and I tried them. They stopped the itching and burning and I used four cakes of Soap and three boxes of Ointment which healed me." (Signed) Miss W. A. Hayes, Bloomington, N. S., Dec. 26, 1911.

Small Size, Ointment 25¢ and 50¢. Sold throughout the Dominion. Canadian Depot: The Limited, 38 Post Street West, Toronto. Cuticura Soap shaves without mess.

Will Build More Grain Elevators. It is announced that Alberta Pacific Grain Company will build a number of new grain elevators in the Peace River district.

FREQUENT HEADACHES

A Sure Sign That The Blood Is Watery and Impure.

People with thin blood are much more subject to headaches than full-blooded persons, and the form of anaemia that afflicts growing girls is almost always accompanied by headaches, together with disturbance of the digestive organs.

Whenever you have constant or recurring headaches, the pallor of the face, they show that the blood is thin and your efforts should be directed toward building up the blood. A fair treatment with Dr. Williams' Pink Pills will do this effectively, and the rich red blood made by these pills will remove the headache.

More disturbances to the health are caused by their mind than most people have any idea of. When your blood is impoverished, the nerves suffer from lack of nourishment, and you may be troubled with insomnia, neuritis, neuralgia or sciatica. Muscles subject to strain under-nourished and you may have muscular rheumatism or lumbago. If your blood is thin and you begin to show symptoms of any of these disorders, try building up the blood with Dr. Williams' Pink Pills, and as the blood is restored to its normal condition every symptom of the trouble will disappear. There are more people who owe their present state of good health to Dr. Williams' Pink Pills than to any other medicine, and most of them do not hesitate to say so.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Against Too Much Production.

Declaring that the present period of depression is due to the fact that workmen have produced too much, and that for this reason employers are requiring their workmen to "take a rest," Alexander Howat, President of the Kansas Miners' Union, advised the laborer not to "produce too much or you may produce yourself out of a job" in a speech at Kansas City recently before an audience of laborers.

MOTHERS!

WATCH YOUR TEETHING BABIES

THOUSANDS OF THEM DIE EVERY SUMMER

When the baby starts to cut its teeth, then is the time the poor mother is under the stress of great anxiety. The child's bowels become loose, and diarrhoea, dysentery, colic, cramps and many other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes to a shadow, and very often the termination is fatal.

On the first indication of any looseness of the bowels, give a few doses of

DR. FOWLER'S

EXTRACT OF

WILD STRAWBERRY

and thus, perhaps, save your baby's life.

For the past 76 years "Dr. Fowler's Extract of Wild Strawberry" for teething babies so you do not experiment with a new and untried remedy which might be dangerous to your darling's health.

Price, 50c a bottle; put up by The T. Milburn Co., Limited, Toronto, Ont.

Charming Frock Of Swiss and Organdie

By Marie Belmont.

Among the sheer fabrics that are greatly liked for the dainty summer dress are organdie and dotted Swiss. When they are combined most charming creations are achieved. The model illustrated is fashioned from white organdie and Swiss that shows pink, yellow and blue dots on a background of palest blue. The latter material is chosen for the deep yoke, which is bound with pipings of white organdie. The lower part of the waist is of organdie. The belt has an inset of the Swiss, while the lower part of the tunic is fashioned from the dotted material.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved its blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. It would be double the price it would be a cheap liniment.

New B.C. Industry.

The National Industries Corporation is about to commence construction of a large manufacturing plant on Industrial Island, B.C., where rivetless sickle blades will be made. Knives will be manufactured for all standard grain and hay cutting machines.

The publisher of the best Farmers' paper in the Maritime Provinces, in writing to us, states:

"I would say that I do not know of a medicine that has stood the test of time like MINARD'S LINIMENT. It has been an unailing remedy in our household ever since I can remember, and has outlived dozens of would-be competitors and imitators."

Praise For Lord Byng

London Daily Telegraph Prints Laudatory Article on New Governor-General.

In a laudatory article on Lord Byng of Vimy, Canada's new Governor-General, the London Daily Telegraph remarks that whatever differences there may be between him and his immediate predecessor, both he and the Duke of Devonshire might well be chosen as typical English gentlemen.

"The Dominions inheriting all that is good in our traditions," says the article, "without the material disadvantages of the old world, have perhaps an easier task than we, but within the Empire, we are all one people, and no Canadian will watch with more pride the prosperity and happiness of Canada under Lord Byng's governorship than the citizens of the Old Country."

Seaweeds do not obtain nourishment from the soil at the bottom of the sea, but from the matter contained in sea water.

Minard's Liniment for sale everywhere.

Think these Points Over with Care

They may apply to you. Becham's Pills have been, for seventy years, used by thousands of people and are today considered very useful in safeguarding health. Becham's Pills help to overcome disorders of the stomach, liver and bowels, prevent biliousness, constipation, indigestion, sick-headache. They keep clear the complexion and help to purify the blood. Consider well and take

BECHAM'S PILLS

Largest Sale of any Medicine in the World

Alberta Coal Production.

Production of all classes of coal in Alberta during 1920 amounted to 7,010,845 tons, valued at \$3,919,240, the highest in the coal mining history of Alberta. Of the total production 130,594 tons were anthracite, 3,419,021 bituminous, 3,359,308 domestic coal and 101,922 briquettes.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh. These subject to frequent "colds in the head" should take CATARRH MEDICINE. This System and render them less liable to colds. Nasal Catarrh, Acute Catarrh, Allergies, Hay Fever, etc., lead to Chronic Catarrh. CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Prize Sheep From Royal Ranch.

The Prince of Wales is exhibiting his Shropshire sheep from his ranch at High River at the Western Canadian fair this summer. Already they have won many Alberta ribbons.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

It pays to patronize home industry. Buy from the merchants in your own town.

MONEY ORDERS

Send a Dominion Express Money Order. They are payable everywhere.

Cook's Cotton Root Compound

A safe, reliable, regulating medicine. Held in three degrees. Sold by all druggists, or sent by mail on receipt of \$1.00. No. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100. and How to Feed Mailed. Free to any Address by the Author. H. CLAY GLOVER CO., INC., 118 West Street, New York, U.S.A.

ASPIRIN

Only "Bayer" is Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting Aspirin at all. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, and Menstrual Pain. Then you will be following the directions and dosage worked out by physicians during twenty years and proved safe by millions. Handy tin boxes of twelve Bayer Tablets of Aspirin cost less cents. Larger boxes of 50 and 100 tablets are also sold. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocaceticacidester of Salicylicacid.

ROYAL YEAST CAKES

RICH IN VITAMINES

MADE IN CANADA

The Importance of Vitamines in food is being recognized at the present time to a greater extent than ever before. It has been conclusively demonstrated that yeast is rich in this all important element. Many people have received great benefit physically simply by taking one, two or three Royal Yeast Cakes a day. Send name and address for free copy "Royal Yeast Cakes for Better Health."

World Happenings Briefly Told

A new telephone transmitter, held to the throat instead of the mouth, eliminates outside noises.

There are now 599 newspapers and periodicals published in the province of Ontario, as against 745 before the war.

Machine betting at Brighouse Park, Vancouver, this year will be supervised by the Royal Canadian Mounted Police.

Nelson, B.C., city council have established a municipal motor camp, equipped with shade, electric light and cooking facilities.

Canada has the largest forest in the world. It is in the Labrador and Hudson Bay district, and is, roughly, 1,000 by 1,700 miles.

Resumption of diplomatic relations between France and the Vatican have been formally effected after a break that has existed since 1904.

The 19,300 ton liner, Tirpitz, built in Germany during the war and completed shortly after, has been purchased outright by the Canadian Pacific Railway and will be added to its Pacific ocean fleet. She will be renamed the Empress of China.

THIS WOMAN'S RECOVERY

Shows Remarkable Restorative Power of Lydia E. Pinkham's Vegetable Compound.

Chelsea, Ont.—"Before using Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pains in my sides and was not regular. Finally I got so weak I could not get up stairs without stopping to rest half way up the steps. I tried two doctors but they did me no good. I saw your medicine advertised in the newspapers and thought I would give it a trial. I took four bottles of the Vegetable Compound and was restored to health. I am married, am the mother of two children, and do all my household, milk eight cows, and do a hard man's work and enjoy the best of health. I also found Vegetable Compound a great help for my weak back before two babies but they do not mind me now. I recommend it to all my friends who are in need of medicine, and you may print this letter if you wish. Mrs. HENRY JANKER, R. R. No. 4, Chelsea, Ontario.

It hardly seems possible that there is a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

ATLAS LUMBER Co'y. BUILD IT NOW

Reconstruct the Old Home For Longer Usefulness

Reconstruction begins at home. If the old house isn't all you desire, and you can't build a new one, a little of the right kind of repairing and remodeling will readily restore it to present day standards.

Perhaps it's a new porch, a summer kitchen, a side entrance, a new roof, extra rooms in the attic or a renewing of old, cracked walls and ceilings that is needed.

The right kind of lumber used in the right way will make the change and we have all the material you will require including that knowledge and crackless manufactured lumber Beaver Board, for better walls and ceilings.

Suppose you ask us about it?

Crossfield Garage

LOCAL AND GENERAL

Mrs. Milne who has been spending a vacation with her sister Mrs. A. Jessiman, returned to her home in Winnipeg, on Saturday last. Mrs. Jessiman accompanied her to Calgary.

Mr. and Mrs. G. T. Jones and family and Mr. Rees Jones motored to Calgary, on Friday last.

Mr. and Mrs. B. Lilley visited relatives and friends at Didsbury over the past week end.

"The Didsbury Agricultural Society are holding their Annual Exhibition on Wednesday, August 24th and the people of Crossfield and district are cordially invited to be there and spend a day with the Didsbury people. Didsbury puts up an exceptionally fine show of pure bred stock and other Agricultural products, a full program of athletic events, including a baseball tournament, and music has been arranged, so that a very pleasant day is assured those who attend."

Boys' Camp at Sylvan Lake

Including leaders, there were 71 in attendance. Those from Crossfield were John Becker, Jim Belshaw, Gordon Purvis, Alfred Stevens, Donnie McFadyen, with their leader Rev. R. K. Swenerton. The Camp was divided according to the plan of Indian tribes with a Grand Chief, Big Chiefs, (the men) and Little Chiefs, (the older boys), and braves. John Becker was Chief of the Mohawks. Athletic contests on the C. S. E. T. plan were run off, which included sprints, long distance throwing, target competition, and jumping. The honors came to Crossfield as Alfred Stevens took first place. The boys were grouped according to age and weight, the tests being more severe for the older boys. John Becker held the eighth place. The swimming in the pure, clear water of Sylvan Lake, the evening bonfires on the shore with the story-telling and the stunts, the games and hikes, the chapel services, the hall of fame and other features will long live in the lives of those present.

If We Lose the Bacon Hog The Death Warrant of Our Export Trade

The following extract from a pamphlet entitled, "The Bacon Hog and the British Market," prepared in 1915 by the late Mr. John Bright and Mr. H. S. Arroll, Dominion Livestock Commissioner, defines the position to-day of the heavy hog in Canada very plainly:—

"There is no sound argument for the production of the fat hog in Canada. We have long since been forced out of that business because of the peculiarly strong advantages possessed by the United States in the marketing facilities and outlet for the product of that type of hog. The nature of our home and export demand makes the bacon hog the necessary type for the Dominion. To produce the fat hog economically the feeding of large quantities of cheap corn is absolutely necessary and the greater part of the hog output of the United States is produced for competitive marketing unless grown on corn."

"There is a certain rigid home demand for our fat hogs but as soon as this demand has been supplied and the attempt made to dispose of the surplus in Great Britain, we should find ourselves put out of business by American competition. If we lose the bacon hog we sign the death warrant of our export trade in hog products."

"If we are to make our Canadian product the bacon of the British people then the words 'Canadian Whitehead side' must be a guarantee of standard type and quality. Failure to meet requirements by not producing the desired uniformity of type is a condition which must not be tolerated. We must conform to market requirements. Close adherence to type by the farmer, together with proper feeding, and a similar degree of care in the curing and marketing by the packer, will steadily build up a reputation for quality and uniformity, such that the position of our bacon in relation to other brands will be steadily improved. The British market is inexorable in its demand for the choicest quality."
